

Active Transportation

Our Mission & Vision

Create a **sustainable** transportation environment for future generations

At KOA, we believe that active transportation planning and engineering plays an important role in creating *safer, healthier, and more equitable communities.*

Our projects deliver long-term outcomes that help communities' expand transportation options for people of all ages and abilities. With travel needs shifting, active transportation has important implications for the future mobility and sustainability of our cities.

We have witnessed first-hand the transformative nature of active transportation projects on communities across Southern California.

KOA's expertise in both planning and engineering design can be seen through our diverse portfolio of active transportation projects.

KOA offers a unique approach that balances **the need for a planning vision with the expertise of our engineering and design.**

As cities' transportation systems continue to evolve, KOA remains committed to providing clients with our expertise in industry best practices and overall planning and design creativity.

As a recognized leader in active transportation planning, design, and implementation, KOA's planners and engineers work closely to identify and develop projects that not only meet communities' needs, but are also innovative and feasible to construct.

We provide our clients with knowledge and expertise in active transportation improvements to enhance the quality of life for their communities.

Daisy-Myrtle 10-Mile Bike Boulevard

City of Long Beach, CA
