ABOUT US

Founded in 1987, KOA is a leading provider in civil engineering, traffic engineering, transportation planning and construction management services for public agencies and private sector clients. We offer our clients technical knowledge, innovative solutions and responsive services. The hallmark of our success is our dedication to each and every project and our desire to leave a legacy of extraordinary contributions to our communities. Our staff includes certified transportation planners, registered civil and traffic engineers, project/construction managers, and construction inspectors.

SYSTEMIC SAFETY ANALYSIS REPORT PROGRAM (SSARP)/ LOCAL ROADWAY SAFETY PLAN (LRSP)

KOA has extensive transportation engineering experience with Highway Safety Improvement Program (HSIP) projects, roadway safety, and GIS "big data" analysis projects. Along with our grant writing and management services, we have become an industry leader within the Caltrans Systemic Safety Analysis Report Program (SSARP). The success of our company in SSARP projects and other planning projects stems from our multi-disciplinary approach and collaboration between our team of skilled planners and engineers.

GRANT WRITING & MANAGEMENT

KOA is well-versed in the procedures and requirements of preparing grant applications, especially for Active Transportation projects (ATP). KOA provides the necessary planning level analyses, maps, and exhibits needed to develop compelling narratives for each grant application. As part of our services, we prepare engineering plans and detailed cost estimates that are important for securing funding.

OUR SERVICES

ENGINEERING

KOA has a reputation for innovation and leadership in the design and engineering of transportation systems throughout Southern California. We have demonstrated engineering leadership in all aspects of our streets and highways including traffic signals, intelligent transportation systems, communications, signal timing and operations, street lighting, intersection design, highway design, parking, worksite traffic control, active transportation and complete streets, transit systems, ADA compliance, and systemic safety analysis reporting.

PLANNING

KOA's transportation planning team balances the needs of all aspects of the transportation system in every project we undertake, applying and developing the best practices in the industry. Our planners and engineers develop ideas and solutions that work as well on paper as they do once constructed. Our goal is to plan rapidly changing world of how we live, work, play, and travel. Our solutions to transportation systems that promote safety and alternate forms of mobility.

ACTIVE TRANSPORTATION

At KOA, we believe that active transportation plays an important role in creating safer, healthier, and more equitable communities. Through our efforts in planning and design, we have developed a diverse portfolio of active transportation projects over the years, many of which have since been constructed. We have witnessed first-hand the transformative nature of active transportation projects on communities across Southern California.

CONSTRUCTION MANAGEMENT

Our construction professionals apply many years of experience on federal, state, and locally funded projects, including municipal agency, utility, and private construction. We provide construction management and observation services for bridges, highways, civil projects, roadways, utilities, transportation, rail, airports, vertical structures, and park projects. KOA provides all parties with up-to-the-minute information and is sensitive to the special needs of the community.

OUR MISSION & VISION

Create a sustainable transportation environment for future generations

KOA CONNECTS COMMUNITIES

KOA continues to improve and advance communities in Southern California through our commitment to providing exceptional service to our clients.
