# Neighborhood Traffic Management Program (NTMP)

**KOA**

## What is NTMP?

NTMP stands for Neighborhood Traffic Management Program. A NTMP identifies the cause of neighborhood traffic and safety issues, and determines feasible traffic calming and safety solutions. It is a program adopted by jurisdictions to enhance and protect the quality of living by making neighborhoods safer for pedestrians, bicyclists, and motorists.
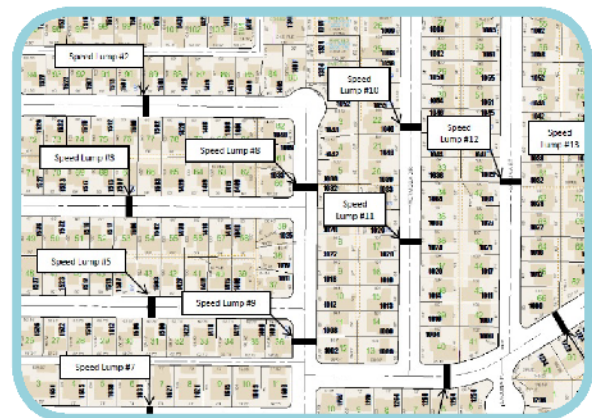

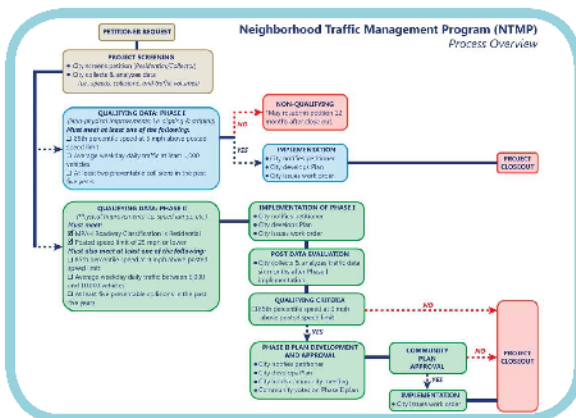

## What does a jurisdiction need to do to implement their own NTMP?

- **Establish procedures** for a resident petition process
- **Provide a tool box** with different devices which may be used to address neighborhood traffic related concerns
- **Establish policies** to be adopted by the City council

## HOW CAN KOA HELP YOU IMPROVE/CREATE YOUR NTMP?

- *Streamline* petition & approval processing procedures
- *Develop* forms for petition submittal and other communications
- *Develop* prioritization criteria & tools to help process petitions
- *Prepare* a tool box to provide guidance for best solutions for traffic calming
- *Create* interactive GIS maps and website content
- *Generate and update* frequently asked questions (FAQ's) and responses
- *Update* the NTMP document with a new layout and improved graphics
